2.11.2

Copyright © 1999-2018 The BibleTime Team

Abstract

BibleTime is a completely free Bible study program. The program's user interface is built with the Qt framework, which makes it run on several operating systems including Linux, Windows, FreeBSD and Mac OS X. The software uses the SWORD programming library to work with over 900 free Bible texts, commentaries, dictionaries and books in over 50 languages provided by the Crosswire Bible Society and several other repositories.

BibleTimen käsikirja jaetaan BibleTime-ohjelman yhteydessä.

Chapter 1. Johdanto

Tietoja BibleTime:stä

BibleTime is a Bible study tool with support for different types of texts and languages. Even large amounts of works modules are easy to install and manage. It is built on the SWORD [<http://www.crosswire.org/sword/>] library, which provides the back-end functionality for BibleTime, such as viewing Bible text, searching etc. SWORD is the flagship product of the Crosswire Bible Society [<http://www.crosswire.org>].

BibleTime is designed to be used with works encoded in one of the formats supported by the SWORD project. Complete information on the supported document formats can be found in the developers section [<http://www.crosswire.org/sword/develop/index.jsp>] of the SWORD Project, Crosswire Bible Society.

Saatavana olevat tehtävät

Over 280 documents in 50 languages are available from the Crosswire Bible Society [<http://www.crosswire.org>]. These include:

Raamattu	The full Bible text, with optional things like Strong's Numbers, headings and/or footnotes in the text. Bibles are available in many languages, and include not only modern versions, but also ancient texts like the Codex Leningradensis ("WLC", Hebrew), and the Septuagint ("LXX", Greek). This is the most advanced section in the library of the SWORD project.
Kirjat	Tarjollaolevat kirjat sisältävät teokset "Imitation of Christ", "Enuma Elish", ja "Josephus: The Complete Works"
Kommentaareja	Commentaries available include classics like John Wesley's "Notes on the Bible", Matthew Henry's commentary and Luther's "Commentary on Galatians." With the <i>Personal</i> commentary you can record your own personal notes to sections of the Bible.
Päivittäiset hartaukset	Monet ihmiset pitävät arvossa päivän Sanaa. Saatavillaolevat teokset sisältävät Daily Light Daily Pathilla, ja Losungenin.
Sanakirjat	Lexicons available include: Robinson's Morphological Analysis Codes, and the International Standard Bible Encyclopaedia. Dictionaries available include Strong's Hebrew Bible Dictionary, Strong's Greek Bible Dictionary, Webster's Revised Unabridged Dictionary of the English Language 1913, Nave's Topical Bible.

There are several other repositories that BibleTime can use.

Motivaatiota

Halumme on palvella Jumalaa ja teemme osamme auttaaksemme muita Jumalasuhteen kasvussa. Yritämme päästä siihen tehokkaalla, laadukkaalla ohjelmalla, ja vielä tehdä siitä yksinkertainen ja opastava käytössä. Meidän halumme on, että Jumalaa ylistettäisiin, sillä hän on kaikkien hyvien asioiden lähde.

Jokainen hyvä anti ja jokainen täydellinen lahja tulee ylhäältä, taivaan tähtien Isältä, jonka luona ei mikään muutu, ei valo vaihdu varjoksi.

—Jaak 1:17, NASB

Jumala siunatkoon sinua käyttäessäsi tätä ohjelmaa.

Chapter 2. BibleTimen käynnistys

Kuinka BibleTime käynnistetään

BibleTimen käynnistys

BibleTime is an executable file that is integrated with the desktop. You can launch BibleTime from the Start Menu with this icon:

BibleTime can also be launched from a terminal command prompt. To launch BibleTime, open a terminal window and type:

```
bibletime
```

Käynnistuksen säätäminen

From a terminal you can use BibleTime to open a random verse in the default bible:

```
bibletime --open-default-bible "<random>"
```

To open at a given passage like John 3:16, use:

```
bibletime --open-default-bible "Joh 3:16"
```

You can also use booknames in your current bookname language.

BibleTimen aloitus ensimmäistä kertaa

If you are starting BibleTime for the first time, you will want to configure the following options, available under the Settings menu bar.

Kirjahyllyn hallinta

Modifies your Bookshelf. This dialog lets you modify your Bookshelf, add or delete works from your system. It will only be shown if no default Bookshelf can be found. Please see The Bookshelf Manager section for further details. If you start off with an empty Bookshelf, it will be helpful to install at least one Bible, Commentary, Lexicon and one Book to get to know BibleTime's basic features quickly. You can do this by clicking on the Refresh button. You will be presented with a list of works that are available from the Crosswire Bible Society

Configure BibleTime dialog

Räätälöi BibleTimen. Tässä ikkunassa voit tehdä BibleTime:stä sellaisen kuin haluat. Katso linkistä yksityiskohtainen kuvaus lisää tietoa tästä ikkunasta.

Chapter 3. Ohjelman toiminto

Yleiskatsaus ohjelmaan

This is what a typical BibleTime session looks like:

You can easily see the different parts of the application. The top left window is used to open installed works in the Bookshelf tab, and with the Bookmarks tab you can manage your bookmarks. The little "Mag" window below the Bookshelf is used to display extra information that is embedded in documents. When you move your mouse over a footnote marker, for example, then the Mag will display the actual content of the footnote. The toolbar gives you quick access to important functions, and the Desk on the right side is where you do your real work.

Jatkakaamme katsomalla sovelluksen eri osia erikseen.

BibleTimen osa sovellusikkuna

Kirjahylly

Kirjahyllyn kaikkien asennettujen teosten luettelo, lajiteltu kategorioittain ja kielten mukaan. Se sisältää kategorian "Kirjanmerkit". Sinne voit tallentaa ja hakea omia kirjanmerkkejäsi.

Lukutehtäviä

To open a work from the bookshelf for reading, simply double-click with the left mouse button on the desired category (Bibles, Commentaries, Lexicons, Books, Devotionals or Glossaries) to display its con-

tents. Then just double-click on one of the works to open it for reading. A read window will appear in the Desk area.

If you are reading a certain work, and want to open another work at the passage you are reading, you can use a shortcut. Simply click with the left mouse button on the verse/passage reference (pointer changes to hand) and drag it to the Bookshelf. Drop it on the work you want to open, and it will be opened for reading at the specified location. You can also drag a verse reference into an existing read window, then it will jump to the specified location.

Tehtävien lisätiedot

If you click with the right mouse button on the symbol of a work, you will see a menu with additional entries that are relevant for this work. "About this work" opens a window with lots of interesting information about the selected work. "Unlock this work" opens a small dialog for encrypted documents, where you can enter the unlock key to access the work. For additional information on locked works, please see the Locked Modules [<http://www.crosswire.org/sword/modules/aboutlocked.jsp>] page on the Crosswire Bible Society web site.

Etsintä teoksista

You can search in a work by clicking with the right mouse button on its symbol and selecting "Search in work(s)". By pressing Shift and clicking on other works you can select more than one. Then follow the same procedure to open the search dialog. You will be searching in all of these documents. A complete description of the operation of the search features can be found on the Searching in Works section.

Kirjanmerkkityöskentely

Tip

Raahaa & pudota tehtävä tähän

Click with the right mouse button on the bookmark category of the bookshelf and select "Create new folder" to create a new bookmark subfolder. You can use normal drag & drop functions to drag verse references from read windows or search results to the bookmark folder, and to rearrange bookmarks between folders.

You can also import bookmarks from other people or export bookmarks to share them. To do this, open the context menu of the bookmark folder as described above, and select "Export bookmarks". This will bring up a dialog box for you to save the bookmark collection. You can import bookmarks in a similar way.

Voit napsauttaa hiiren oikeaa nappia muuttaaksesi kansioiden tai kirjanmerkkien nimiä ja niiden kuvauksia.

Suurennuslasi

This little window in the lower left corner of the BibleTime window is purely passive. Whenever your mouse cursor is located over some text with additional information (e.g., Strong's numbers), then this additional information will be displayed in the Mag, and not in the text itself. Just try it out.

Työpöytä

The Desk is where the real work with BibleTime takes place. Here you can open works from the Bookshelf, read them, search in them, and even save your annotations in the personal commentary module (see below).

Lukutehtäviä

As we have already seen, you can open works for reading simply by clicking on their symbol in the Bookshelf. A read window will open in the Desk's area. Every read window has a toolbar. There you can find tools to navigate in the work that this read window is connected to, as well as history buttons like the ones that you know from your browser.

Lukuikkunan sijoitus

Of course, you can open multiple works at the same time. There are several possibilities for arranging the read windows on the desk. Please have a look at the entry Window in the main menu. There you can see that you can either control the placement of the read windows completely yourself, or have BibleTime handle the placement automatically. To achieve this, you have to select one of the automatic placement modes available at Window → Arrangement mode. Just try it out, it's simple and works.

Muokkaa omaa kommentaariasi

To be able to store your own comments about parts of the Bible, you have to install a certain work from the library of the Crosswire Bible Society [<http://www.crosswire.org>]. This work is called "Personal commentary".

Open the personal commentary by clicking on its symbol in the Bookshelf with a left mouse button. You can edit this commentary by just clicking on any verse. A dialog opens which allows you to add or edit text for that verse.

Tip

If Edit this work is deactivated, please check if you have write permission for the files of the personal commentary.

Tip

Vedä ja pudota toimii tässä. Pudota jakeen viite ja jakeen teksti lisätään.

Etsintä teoksista

Tekstin haku avoimessa lukuikkunassa

You can look for a word or phrase in the open read window (e.g. the chapter of a bible that you're reading) just like you are used to from other programs. This function can be reached either by clicking with the right mouse button and selecting Find..., or by using the shortcut **CtrlF**. Read on to learn how you can search in entire works.

Etsi-ikkunaan pääsy

You can search in a work by clicking with the right mouse button on its symbol in the Bookshelf and selecting Search in work(s). By holding Shift or Ctrl and clicking on other work's names you can select more than one. Then follow the same procedure to open the search dialog. You will be searching in all of these works at the same time.

You can also access the search dialog by clicking on Search from the main menu, and selecting the appropriate entry.

Kolmas mahdollisuus aloittaa hakuja on napsauttaa hiirellä hakusymbolia avoimessa lukuikkunassa.

Etsinnän asetukset

Tehtävien valinta

At the top of the options tab you will find Choose(works). If you would like to search in multiple works, click on this button and you will be offered a menu where you can select the works you want to search in.

Hakualueiden käyttäminen

You can narrow the scope of your search to certain parts of the Bible by selecting one of the predefined scopes from the list in Search scope. You can define your own search ranges by clicking the Setup ranges button.

Perushaun syntaksiohje

Enter the search phrase separated by spaces. By default the search function will return results that match all the words. If you want to find any of the words entered, select the Some words button. If you want to perform a more complex search, select the Free button. You can see examples of searches by clicking on full syntax.

You can use wildcards: '*' matches any number of characters, while '?' will match any single character. The use of parenthesis allows you to group your search terms, e.g. '(Jesus OR spirit) AND God'.

To search text other than the main text, enter the text type followed by ':', and then the search term. Refer to the table below for examples.

Saatavilla olevat tekstityypit:

Table 3.1. Etsimistyytit

Etuliite	Merkitys	Esimerkki
otsikko:	etsii otsikoita	otsikko:Jeesus
alaviite:	etsii alaviitteitä	alaviite:Mooses
vahvennos:	etsii Strongin numeroita	strong:G535
muoto:	etsii morfologisia koodeja	morph:N-GSM

Tip

You can right click on an installed work and select About to find which of the above search criteria may work for you. Not all works have the built in features for performing this type of search.

BibleTime uses the Lucene search engine to perform your searches. It has many advanced features, and you can read more about it here: <http://lucene.apache.org/java/docs/index.html> [<http://lucene.apache.org/java/docs/index.html>].

Etsinnän tulokset

Here you can see how many instances of the search string were found, sorted by works. Clicking on a work with the right mouse button allows you to copy, save, or print all verses that were found in a certain work at once. This also works when you click on one or more of the references to copy, save or print them. Clicking on a particular reference opens that verse up in context in the preview window below.

Tip

Vedä viite ja pudota se teoksen symboliin kirjahyllyssä avataksesi teoksen lukuikkunaan sen jakeen kohdalta.

Tip

Vedä viite ja pudota se avoimeen lukuikkunaan ja lukukohta hyppää sen jakeen kohdalle.

Tip

Valitse viitteet ja vedä ne kirjahyllyyn luodaksesi kirjanmerkkejä.

Etsintätulosten analysointi

Click on Search analysis to open the search analysis display. This gives a simple graphic analysis of the number of instances the search string was found in each book of the Bible, and you can also save the analysis.

Kirjahyllyn hallinta

The Bookshelf Manager is a tool to manage your Bookshelf. You can install new works to your Bookshelf, and update or remove existing works from your Bookshelf. Access it by clicking Settings → Bookshelf Manager in the main menu.

Install works

With this facility, you can connect to a repository of works (called "library"), and transfer one or more works to your local Bookshelf. These libraries may be local (e.g. a SWORD CD), or remote (e.g. Crosswire's online repository of SWORD modules, or another site offering SWORD modules). BibleTime will automatically maintain a list of remote libraries and the works available from them.

To begin the installation process, select one or more libraries that you want to install works from. Then click on the Next button. Then select one or more languages and click the Next button. You will see a list of categories. Double-click on a category to see works for that category. Select one or more works and then click on the Install Works. After the works are installed, click on the Finish.

Update works

If there are any works that can be updated, they will be shown. Select one or more work and click the Update Works. After the works are updated, click on the Finish.

Remove works

This facility allows you to delete one or more of the works from your Bookshelf too free up disk space. Simply choose the works and click on the Remove works button.

Vienti ja tulostus

In many places, you can open a context menu by clicking with the right mouse button. Depending on context, it will allow you to Select, Copy (to clipboard), Save or Print text. This works for example in the read windows, when you click on the normal text or the verse reference, or in the search result page when you click on a work or one or more verse references. It is pretty straightforward, so just try it out.

Printing from BibleTime is rather basic and is intended as a utility. If you are composing a document or presentation containing text from BibleTime works, we suggest that you use one of the presentation or editing tools on your system to format your document, rather than printing from BibleTime directly.

Chapter 4. BibleTime:n asetukset

Tässä osiossa on yleiskuvaus, kuinka BibleTime:n asetuksia asetetaan. Ohjelmassa tämä löytyy päävalikon Asetukset -kohdasta.

BibleTime asetukset-ikkuna

BibleTime käyttöliittymä voidaan muokata monella tavalla tarpeittesi mukaan. Pääset asetusikkunaan valitsemalla Asetukset Aseta BibleTime.

Näyttö

Käynnistyskäyttäytymistä voidaan säätää. Valitse seuraavista valinnoista:

- Näytä aloituskuva

Näyttömallit määrittelevät tekstin renderöinnin (värit, koko jne.). Saatavana on erilaisia sisäänrakennettuja mallipohjia. Jos valitset yhden sellaisen, näet esikatselukuvan oikealla paneelissa.

Työpöytä

Many features provided by the SWORD backend can now be customized in BibleTime. These features are documented right in the dialog. You also have the possibility to specify standard works that should be used when no specific work is specified in a reference. An example: The standard Bible is used to display the content of cross references in the Bible. When you hover over them, the Mag will show the content of the verses referred to, according to the standard Bible you specified. With the use of text filters, you can control the appearance of the text.

Kielet

Tässä voit määritellä, mitä kieltä käytetään kirjojen nimissä. Aseta tämä äidinkieleksesi, jos se on saatavilla. Silloin tunnet olosi kotoisaksi.

By default, BibleTime uses the default system display font. You can override this font if necessary. Some languages require special fonts to be displayed correctly, and this dialog allows you to specify a custom font for each language.

Valintaikkuna - Kirjasimet.

BibleTime can now use all supported fonts. As long as the works you are interested in display correctly nothing needs to be done here. If a work only displays as a series of question marks (?????) or empty boxes, then you know that the standard display font does not contain the characters used in this work.

To correct this, choose this work's language from the drop down menu. Select the use custom font checkbox. Now select a font. For example, a font that supports many languages is Code2000. If no installed font can display the work you are interested in, try installing the localization package for that language.

Kirjasimien asennus

Detailed font installation instructions are outside the scope of this handbook. For further information you might want to refer to the Unicode HOWTO [<http://www.linux.org/docs/ldp/howto/Unicode-HOWTO-2.html>].

Fonts can be installed from a number of sources:

- Sinun *nix jakelusi.
- Distribuutiosi lokalisointipaketit.
- Olemassaoleva Microsoft Windows® -asennus samalla tietokoneella.
- Kirjasinkokoelma, sellainen kuin on saatavilla Adobella tai Bitstreamilla.

- Online kirjasinkokoelmat.

Unicode-kirjasimet tarjoavat enemmän merkkejä kuin muut kirjasimet, ja osa niistä kirjasimista on saatavilla ilmaiseksi. Mikään saatavillaoleva kirjasin ei sisällä kaikkia Unicode-standardin määrittelemiä merkkejä. Sinun tulee siis käyttää eri kirjasimia eri kielille.

Table 4.1. Unicode-kirjasimet

Code2000 [http://code2000.net/CODE2000.ZIP]	Ehkä paras ilmainen Unicode-kirjasin, käsittää laajan joukon merkkejä.
SIL unicode fontit [http://scripts.sil.org/cms/scripts/page.php?site_id=nrsi&cat_id=FontDownloads]	Erinomaiset Unicode-fontit Linguisticsin kesä-instituutista.
FreeFont [http://www.nongnu.org/freefont/]	A new free Unicode font initiative.
Crosswired kirjasinhakemisto [ftp://ftp.crosswire.org/pub/sword/iso/latest/FONTS/]	Useita fontteja saatavilla Crosswire Bible Society FTP-palvelimella.
Bitstream CyberBit [http://aol-4.vo.llnwd.net/pub/communicator/extras/fonts/windows/]	Käsittää melkein koko Unicode-merkistön, mutta hidastuttaa BibleTimeä merkittävästi koon vuoksi.
Clearlyu	Sisältyy muutamiiin jakeludistributioihin. Sisältää euroopan, kreikan, heprean ja Thai-kielen.
Caslon, Monospace, Cupola, Caliban [http://fontforge.sourceforge.net/sfds/]	Osittainen peittävyys, katso tietoja linkitetyltä sivulta.

Netissä on hyviä Unicode-kirjasinluetteloja, kuten Christoph Singerin (Multilingual Unicode TrueType Fonts in the Internet [<http://www.slovo.info/unifonts.htm>]), tai Alan Woodin (Unicode character ranges and the Unicode fonts that support them [<http://www.alanwood.net/unicode/fontsbyrange.html>]).

Shortcuts

Shortcuts (previously known as HotKeys) are special key commands that can be used in the place of the menu items and icons. A number of BibleTime's commands have predefined Shortcuts (see the Shortcuts section for a complete listing). Most of BibleTime's commands can be assigned Shortcuts. This is very helpful to quickly access the functions that you need the most.

In the preceding example, F2, Bible Study HowTo has a secondary shortcut defined, CTRL+2.

Chapter 5. Viittaus

Päävalikon käyttöopas

In this section you can find detailed descriptions of all entries in the main menu of BibleTime. They are ordered in just the way they appear in BibleTime, with all the sub-items listed under the major menu item they belong to. You can also see the shortcut of each item; a complete listing of all shortcuts can be found in the shortcuts section.

Shortcuts index

This is an index of all shortcuts and their corresponding description in the handbook. The shortcuts are sorted (roughly) alphabetical. If you want to directly find out which shortcuts a certain menu item has, you can either look at the entry itself in BibleTime (as it always shows the shortcut), or you can look it in the Main Menu reference.

Shortcut	Kuvaus
Alt+Left	Siirtyy lukuikkunan historiassa taaksepäin.
Alt+Right	Siirtyy lukuikkunan historiassa eteenpäin
Ctrl+Alt+F	Search → Search in default bible equivalent; opens the search dialog to search in the default bible.
Ctrl+Alt+G	Window → Arrangement mode → Auto-tile vertically equivalent; toggle automatic window tiling.
Ctrl+Alt+H	Window → Arrangement mode → Auto-tile horizontally equivalent; toggle automatic window tiling.
Ctrl+Alt+I	Window → Arrangement mode → Auto-tile equivalent; toggle automatic window tiling.
Ctrl+Alt+J	Window → Arrangement mode → Auto-cascade equivalent; toggle automatic window cascading.
Ctrl+Alt+M	Window → Arrangement mode → Manual mode equivalent; toggle manual window placement.
Ctrl+Alt+T	Window → Arrangement mode → Tabbed equivalent; organizes windows with tabs across the top.
Ctrl+Alt+S	Window → Save as new session equivalent; saves current layout as new session.
Ctrl+Alt+W	Window → Close all equivalent; closes all open windows.
Ctrl+A	Valitse kaikki. Tämä valitsee kaikki tekstit lukuikkunassa.
Ctrl+C	Kopioi. Tämä kopioi valitun tekstin leikepöydälle.
Ctrl+F	Haku. Tämä etsii lukuikkunan tekstistä.
Ctrl+G	Window → Tile vertically equivalent.
Ctrl+H	Window → Tile horizontally equivalent.
Ctrl+I	Window → Tile windows equivalent.
Ctrl+J	Window → Cascade windows equivalent.
Ctrl+L	Change location. Changes focus to the toolbar field for the selected work.
Ctrl+N	Search with works of this window.
Ctrl+O	Search → Search in open work(s) equivalent; opens the search dialog to search in all currently opened works.
Ctrl+Q	File → Quit equivalent; closes BibleTime.
Ctrl+W	Sulkee nykyisen ikkunan.
